Typescript, Python, MySQL and Nginx.

Skills

- 💡 Human-centric leadership approach
- 💡 Clear communication
- 💡 Problem-solving aptitude

Technologies

- ⚙️ React, TypeScript, Angular
- ⚙️ Next, Laravel, Django
- ⚙️ AWS , Devops

Languages

- 🇬🇧 English
 - 🇳🇱 Dutch
-

Work Experience

Team Lead / Product Owner

kabood.io, *Amsterdam* | *feb '21 - jun '23*

- Lead cross-functional teams throughout the campaign lifecycle, including planning, finance, design, development, testing, and deployment.
- Coordinate with internal and external stakeholders to define project scope, deliverables, timelines, and resource allocation.
- Full stack development of the kabood brand management tool in the cloud. Converting Wagtail CMS to React / Django and later React / Next

As a team lead, I spearheaded the transformation of Kabood from a basic website into a comprehensive online brand management system. This involved transitioning Wagtail CMS, along with its templates, into a headless backend paired with a React frontend. Over time, Kabood evolved from a solo project that I initiated to a thriving startup, where my leadership has nurtured a team of approximately 15 individuals, encompassing both full-time and part-time roles across diverse disciplines, including design, marketing, and development. Initially, I assumed multiple roles, including developer, product owner, and project manager, gradually delegating these responsibilities to others.

Full Stack Developer

martijnwip.nl, Amsterdam | jan 2020 - jan 2021

- Django Python

I was working on a personal project that was set up on AWS. The architecture was scalable, secure, resilient, and facilitated zero downtime deployments. The workflows were based on GitLab Flow to automate processes and speed up deployments. Terraform was used to easily create and destroy environments to keep costs at a minimum. This was to avoid the AWS bill shock.

Technology stack: Django REST, Docker, Postgres, Redis, Travis, CI/CD, TDD, GitLab, AWS, EC2, ALB, ECS, ECR, VPC, S3, and Infrastructure as Code (IaC)."

Full Stack Developer

GGD, Amsterdam | jan 2017 - December 2019

- Frontend development Mobile Apps in Angular & Ionic
- Backend development for multiple WordPress sites like 020veiligthuis.nl
- Full Stack development mydailymoves.nl (Angular & Laravel)

Developing Mobile Apps/PWA for scientific research. Encryption protocols like Base64, PBKDF2, Salt. Technologies: Ionic, Angular 2, Django, Laravel, Typescript, Node, JWT, CryptoJS, MySQL, Gulp, Git. Karma, Jasmine, PHPUnit, TDD.

Wordpress PHP Developer

martijnwip.nl, *Amsterdam* | Oct 2015 - Dec 2016

- Developing Wordpress Backend en Frontend Templates e.g sportrusten.nl
- Developing in Laravel / Eloquent
- MySql / Postgres

I have extensive experience in web development, specializing in WordPress backend and frontend templates, with notable projects such as sportrusten.nl in my portfolio. My proficiency extends to developing robust solutions in Laravel using the Eloquent ORM. I am also well-versed in working with both MySQL and PostgreSQL databases, ensuring efficient and secure data management in my projects

Project Manager

fonk.amsterdam, *Amsterdam* | oct 2012- sept 2015

- Project Management for startups like fixico.nl , <https://getcrafter.nl/> and <https://www.meditolutions.nl/>
- Lead cross-functional teams throughout the campaign lifecycle, including planning, finance, design, development, testing, and deployment.
- Work closely with development teams, architects, and engineers to ensure technical feasibility of product features and user requirements.

As a Project Manager at Fonk, I played a pivotal role in collaborating closely with our clients to define project sprints. My responsibilities included crafting comprehensive product requirement documents that served as guiding roadmaps for our development teams. Additionally, I skillfully estimated project timelines, leveraging user stories as a foundation for precise time assessments.

Wordpress PHP Developer

martijnwip.nl, Amsterdam | aug 2011 - sep 2012

- Wordpress Development for multiple clients for fonk.amsterdam

I developed a WordPress website for wine enthusiasts called Vinorious. This project included creating a comprehensive wine catalog and an interactive event calendar, showcasing my skills in web development and creating a custom theme.

Actionscript Developer

Sanoma Digital, Amsterdam | jan 2010 - aug 2011

- Advertisement Module for Zie.nl en Nu.nl videoplayer
- Evaluating Video Platform voor Sanoma

And many many more (See my LinkedIn)
